Ms. Mildred M. Goldstein President Harry J. Bosworth Company 7227 North Hamlin Avenue Skokie, Illinois 60076

Re: K040547

Trade/Device Name: Aegis® ORTHO Dual-Cured Orthodontic Adhesive

Regulation Number: 21 CFR 872.3750

Regulation Name: Bracket Adhesive Resin and Tooth Conditioner

Regulatory Class: II

Product Codes: DYH and EMA

Dated: February 27, 2004 Received: March 09, 2004

## Dear Ms. Goldstein:

We have reviewed your Section 510(k) premarket notification of intent to market the device referenced above and have determined the device is substantially equivalent (for the indications for use stated in the enclosure) to legally marketed predicate devices marketed in interstate commerce prior to May 28, 1976, the enactment date of the Medical Device Amendments, or to devices that have been reclassified in accordance with the provisions of the Federal Food, Drug, and Cosmetic Act (Act) that do not require approval of a premarket approval application (PMA). You may, therefore, market the device, subject to the general controls provisions of the Act. The general controls provisions of the Act include requirements for annual registration, listing of devices, good manufacturing practice, labeling, and prohibitions against misbranding and adulteration.

If your device is classified (see above) into either class II (Special Controls) or class III (PMA), it may be subject to such additional controls. Existing major regulations affecting your device can be found in the Code of Federal Regulations, Title 21, Parts 800 to 898. In addition, FDA may publish further announcements concerning your device in the Federal Register.

Please be advised that FDA's issuance of a substantial equivalence determination does not mean that FDA has made a determination that your device complies with other requirements of the Act or any Federal statutes and regulations administered by other Federal agencies. You must comply with all the Act's requirements, including, but not limited to: registration and listing (21 CFR Part 807); labeling (21 CFR Part 801); good manufacturing practice requirements as set forth in the quality systems (QS) regulation (21 CFR Part 820); and if applicable, the electronic product radiation control provisions (Sections 531-542 of the Act); 21 CFR 1000-1050.

This letter will allow you to begin marketing your device as described in your Section 510(k) premarket notification. The FDA finding of substantial equivalence of your device to a legally marketed predicate device results in a classification for your device and thus, permits your device to proceed to the market.

If you desire specific advice for your device on our labeling regulation (21 CFR Part 801), please contact the Office of Compliance at (301) 594-4613. Additionally, for questions on the promotion and advertising of your device, please contact the Office of Compliance at (301) 594-4639. Also, please note the regulation entitled, "Misbranding by reference to premarket notification" (21CFR Part 807.97) you may obtain. Other general information on your responsibilities under the Act may be obtained from the Division of Small Manufacturers, International and Consumer Assistance at its toll-free number (800) 638-2041 or (301) 443-6597 or at its Internet address <a href="http://www.fda.gov/cdrh/dsma/dsmamain.html">http://www.fda.gov/cdrh/dsma/dsmamain.html</a>

Sincercly yours,

Chiu S. Lin, PhD

Infection Control, and Dental Devices
Office of Device Evaluation
Center for Devices and
Radiological Health

510(K) Number: <u>K040547</u>

Device Name: Aegis-ORTHO Dual-Cured Orthodontic Adhesive

## INDICATIONS FOR USE:

The orthodontic adhesive is used to bond dental orthodontic brackets onto a tooth or teeth where a filled, two component, dual-cure (light-activated with a post-cure chemical-cure) resin-adhesive is indicated. The adhesive is also indicated when a self-cure or chemical-cure only adhesive is needed to bond orthodontic brackets to teeth. This latter type of cure is used when sufficient light exposure is not possible due to the opacity of the bracket.

The orthodontic adhesive can also be used to bond orthodonticbands in place where a filled, two component, dual-cure resin-adhesive is indicated. The adhesive is also indicated when a self-cure or chemical-cure only adhesive is needed to bond orthodontic bands.

The adhesive can also be used to cement dental restorations (crowns, bridges, veneers, inlays, onlys, etc.) where a filled, two component, dual-cure resin is indicated. The adhesive is also indicated when a self-cure or chemical-cure only adhesive is needed to bond or cement a dental restoration.
